

**PRESS RELEASE**  
15th april 2025, Lorient

## **MODX 70 WORLD PREMIERE AT THE MULTIHULL SHOW**

The MODX 70, a revolutionary 100% electric catamaran and powered by renewable energies, has departed from Lorient and is currently en route to the Multihull Show in La Grande-Motte, where it will be showcased from April 23 to 27, 2025.

This international event will also host the Multihull of the Year Awards, where the MODX 70 is proudly nominated in the Multi-yacht category, recognizing its breakthrough in sustainable innovation and design excellence.

### **INNOVATION, LUXURY & EFFICIENCY**

The MODX 70 paves the way for responsible and environmentally-friendly sailing, with a 100% renewable energy design incorporating cutting-edge "Made in France" technologies.

With its fully automated Aeroforce© inflatable wings, 70 m<sup>2</sup> of solar panels, hydrogeneration system, and 250 kWh battery bank, the MODX 70 delivers a completely silent, autonomous, and zero-emission sailing experience.

But it is not only a technological achievement — the MODX 70 is also an invitation to experience a new kind of luxury at sea.

On board, you'll find: over 185 m<sup>2</sup> of refined living space, a 54 m<sup>2</sup> panoramic saloon with home cinema, a 10-12 person dining area and wine cellar, a 35 m<sup>2</sup> uncluttered foredeck, and a shaded 45 m<sup>2</sup> aft deck with modular lounging and dining setups.

Every detail has been designed to minimize impact on the Ocean, while providing exceptional comfort, elegance and functionality. The MODX 70 is not just a yacht — it's a revolution in the world of sailing.
